

Sr. C# / JavaScript Developer

Company Background

I-Behavior Inc., a fast paced, growing database marketing services company with offices located in Harrison, NY and Louisville, CO has a great opportunity for a highly skilled **Senior C# and JavaScript Developer** in our Louisville, CO office. I-Behavior is now a KBM Group company and part of the [WPP organization](http://www.wpp.com). (www.i-behavior.com)

Position

As a Senior C# and JavaScript Developer, you will utilize your Microsoft technology skills to contribute to the construction of an extremely high volume transactional system supporting online advertisement networks. You will be actively involved in contributing to all aspects of the application development lifecycle from understanding requirements, to collaborating on technical direction, through delivering innovative products to the marketplace, and helping clients integrate into our application.

Specifically, your primary role will be to:

- Design and develop web integration points through a variety of technologies including C# web services, JSON, JavaScript, and others
- Design and develop application features with the goals of maximizing performance, scalability, maintainability, quality, and extensibility
- Develop code using established programming methodologies
- Use your experience and creativity to find new ways to solve business problems
- Work with development team to teach and learn best practices through code reviews and collaboration
- Engage in Agile team practices such as backlog grooming, release planning, sprint planning, daily scrum meetings, and working towards incremental value producing feature construction
- Document code and processes clearly
- Develop unit tests and quality assurance procedures
- Ensure data integrity and quality

Qualifications

- BA or BS in Computer Science or related degree
- 5+ years experience Microsoft Visual Studio, C#, and JavaScript
- 5+ years experience with database systems, including Oracle or MySQL
- Demonstrated experience working in high volume online applications
- Demonstrated experience working on large projects
- Demonstrated experience working with object oriented design concepts
- Hands-on, motivated self-starter with ability to take direction and manage tasks with minimal supervision within an energized, collaborative and entrepreneurial environment
- Excellent communication skills (verbal and written) and listening skills
- Innovative and creative, able to champion new ideas and initiatives with attention to detail

Desired Experience:

- Online Advertisement domain experience

Employee Benefit Package

We offer a competitive compensation and benefits package.
